Claim Objection

1. Claim 13 depends on itself.

Election/Restrictions

2. Restriction to one of the following inventions is required under 35 U.S.C. 121:
 - I. Claims 1-7, 9, 11-31, 41-48 and 62-82, drawn to a charge pump circuit, classified in class 327, subclass 536.
 - II. Claims 8 and 10, drawn to a ring oscillator circuit, classified in class 331, subclass 57.
 - III. Claims 32-40 and 49-61, drawn to a regulator circuit, classified in class 327, subclass 540.

The inventions are distinct, each from the other because of the following reasons:

Inventions I, II and III are related as combination and subcombinations.

Inventions in this relationship are distinct if it can be shown that (1) the combination as claimed does not require the particulars of the subcombinations as claimed for patentability, and (2) that the subcombinations have utility alone or in other combinations (MPEP § 806.05(c)). In the instant case, the combination as claimed does not require the particulars of the subcombinations as claimed because the charge pump could be made with any generic oscillator and regulator. The subcombinations have separate utility such as an oscillator and regulator.

Inventions I, II and III are related as subcombinations disclosed as usable together in a single combination. The subcombinations are distinct from each other if they are shown to be separately usable. In the instant case, inventions I, II and III have separate utility such as a charge pump, oscillator and regulator. See MPEP § 806.05(d).

Because these inventions are distinct for the reasons given above and have acquired a separate status in the art as shown by their different classification, restriction for examination purposes as indicated is proper.

Because these inventions are distinct for the reasons given above and the search required for any of Groups I-III is not required for any other of Groups I-III, restriction for examination purposes as indicated is proper.

Because these inventions are distinct for the reasons given above and have acquired a separate status in the art because of their recognized divergent subject matter, restriction for examination purposes as indicated is proper.

Applicant is advised that the reply to this requirement to be complete must include an election of the invention to be examined even though the requirement be traversed (37 CFR 1.143).

Applicant is reminded that upon the cancellation of claims to a non-elected invention, the inventorship must be amended in compliance with 37 CFR 1.48(b) if one or more of the currently named inventors is no longer an inventor of at least one claim remaining in the application. Any amendment of inventorship must be accompanied by a request under 37 CFR 1.48(b) and by the fee required under 37 CFR 1.17(i).
